

Review

for the educational and scientific program for the preparation of a Doctor of Philosophy in the specialty 073 «Management», implemented at the National University «Yuri Kondratyuk Poltava Polytechnic»

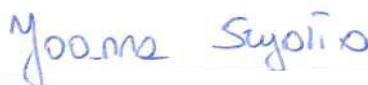

High-quality academic training of applicants for a PhD degree in specialty 073 «Management» in the context of modern development is an important and urgent task of higher education institutions, which is due to the need to provide highly qualified managerial specialists in all spheres of economic and social life.

The volume, content and structure of the educational and scientific program correspond to the established requirements for educational programs of this level of education and take into account the strategic directions of reforming the national economy and are focused on the development trends of the specialty, the labor market, the interests of applicants for higher education.

Applicants for higher education with a PhD degree must demonstrate the key learning outcomes: possession of modern theories and concepts in the field of management; the ability to organize and conduct original scientific research in the field of management at a professional level, achieve scientific results, create new knowledge to solve topical problems of theory and practice; the ability to initiate, develop and implement projects in the field of business, manage them and search for partners for their implementation.

Forms and methods of teaching, presentation and control contribute to the achievement of the goals and programmatic learning outcomes stated in the educational and scientific program, meet the requirements of academic integrity and the principles of academic freedom.

The educational and scientific program for the training of doctors of philosophy in specialty 073 «Management», which is implemented at the National University «Yuri Kondratyuk Poltava Polytechnic» corresponds to the goal and can be used in the educational process for the preparation of graduate students.
